KEY INSIGHTS

ADMISSIONS & OPERATIONS

- 27,891 encounters were recorded across 974 patients, averaging 28.6 encounters per patient
- **Ambulatory visits** dominated at **12.5K encounters**, significantly exceeding all other encounter classes including emergency and inpatient.
- **Evening hours** recorded the highest patient volume (**8.1K encounters**).
- **Monday and Wednesday** were the busiest days (4.3K each), while **Tuesday** recorded the lowest volume.
- Average inpatient length of stay was **1.54 days**, with **1,140 inpatient admissions** recorded.

PATIENT DEMOGRAPHICS

- The patient population is predominantly elderly with an average age of **72.70 years**, and the **75+ group** being the largest age segment.
- **64.68% of patients are seniors (65+)**, reflecting the hospital's significant role in elder care.
- Gender distribution is nearly equal with **50.72% male** and **49.28% female**.
- **80.39% are Non-Hispanic**; Hispanic patients represent **19.61%** of the population.
- **78% of all deaths (120 of 154)** occurred in the 75+ age group, confirming elevated mortality risk among elderly patients.
- Senior patient death rate (**21.11%**) is notably higher than the overall death rate (**16%**).

FINANCIAL INSIGHTS

- Total hospital revenue reached **\$101.51M**, with an average cost of **\$3,640 per encounter**.
- **Ambulatory services** contributed the highest revenue at **\$36M**, making them the primary revenue driver.
- Uninsured encounters accounted for **\$49M** in revenue and represented **31.58%** of all encounters, highlighting a significant reimbursement risk.
- Payer coverage amounted to only **\$31.10M (30.6%)** of total revenue, leaving **\$70.42M (69.4%)** as direct patient out-of-pocket burden.
- **Electrical cardioversion** was the single most expensive procedure at **\$36M** in total charges.
- **Medicaid (94%) and Medicare (78%)** provided the highest coverage rates among active insurers.

EXECUTIVE RECOMMENDATIONS

- **Expand ambulatory and evening services** because these are peak demand periods and the highest revenue generators.
- **Strengthen geriatric care programs**; seniors represent 64.68% of patients and 78% of deaths.
- **Address the uninsured burden**; \$49M in uninsured revenue with zero coverage creates significant financial risk. Explore insurance enrollment support programs.
- **Optimize staffing for Monday/Wednesday evenings**; these are consistently the highest volume periods.
- Conduct a utilization review of electrical cardioversion procedures, which generated **\$36M** in charges, to ensure clinical necessity and cost efficiency.

EXECUTIVE SUMMARY

Massachusetts General Hospital demonstrates strong outpatient performance and revenue generation; however, the high concentration of elderly patients and significant uninsured encounter volume present key operational and financial challenges requiring targeted intervention.
